

MEMORANDUM

Date: 8-31-2012

To: Inga Williams, Principle Planner

From: Andy Stevens, Parks and Natural Resources Manager 

Subject: Preliminary Environmental Assessment of the Proposed Calusa Green Land fill

Staff was provided maps indicating the fallow conditions of the site and staff are in agreement that the site has been in a degraded fallow condition for some time. The former citrus grove was surveyed by Ian Vincent & Associated and staff concurs with their depiction of the site. No listed species were observed on site by his staff or County staff.

Other state agencies, at some time, will review potential off site impacts, if any. County staff did observe the Crested Caracara (*Caracara cheriway*) on the access road to the site. Further review maybe needed by other state and federal agencies.
