Re: Calusa Green

Dear Ms. Williams:

The City of Punta Gorda has reviewed Calusa Green's proposal for a solid waste management facility, in particular, the Hydrogeological Investigation Report prepared by Progressive Water Resources, Inc. Additionally, City staff met with David Brown of Progressive Water Resources, Inc. and with representatives of Calusa Green, LLC.

As this activity is regulated by the Florida Department of Environmental Protection, who will issue a permit for construction and operation, the City of Punta Gorda has no objection to the proposed Calusa Green solid waste management facility.

The City requests the following:

The City of Punta Gorda shall be provided with copies of any and all reports required Florida Department of Environmental Protection operating permit for this facility

Sincerely,

Dennis B. Murphy Sr., PG; PSM
Director of Growth Management
