MURDOCK BRANCH BEFORE THE BOARD OF COUNTY COMMISSIONER 2012 OCT - 1 PM 4:52 OF CHARLOTTE COUNTY Docket Nocl 2011 DOBR BUIT COURT CHARLOTTE COUNTY, FL

RFCEIVED AT

In Re: Application of UTILITIES, INC., OF SANDALHAVEN for an increase in wastewater rates and charges

UTILITIES, INC. OF SANDALHAVEN'S PROPOSED RECOMMENDED ORDER

After adequate notice (Tr. 193; Utility Ex. 1; Ex. RD 6), this cause came on for hearing on August 22 and 23, 2012, in the rate increase application of Utilities Inc. of Sandalhaven, before the appointed Hearing Officer, Diane K. Kiesling.

FINDINGS OF FACT:¹

QUALITY OF SERVICE

ISSUE 1: IS THE QUALITY OF SERVICE PROVIDED BY THE UTILITY CONSIDERED SATISFACTORY?

Finding of Fact 1: The quality of service being provided by the Utility is satisfactory.

<u>Argument</u>: The parties agree to use the process established by the Florida Public Service Commission ("PSC") Rule 25-30.433 (1), F.A.C., in establishing whether the Quality of Service is satisfactory. ("This shall be derived from an evaluation of three separate components of water and wastewater operation: quality of utility's product (water and wastewater); operational condition of the utility's plant and facilities; and the utility's attempt to address customer satisfaction.") In addition, the parties agree that the Utility's

¹ Since the page numbering of the Transcript does not include the prefiled testimony, reference to prefiled direct testimony will include the witnesses' initials, Dir. followed by the page number in the prefiled testimony Example: (FS Dir. 3). Similarly, references to prefiled rebuttal testimony will include the witnesses' initials followed by Reb. followed by the page number. Example: (FS Reb. 3), and surrebuttal with Sur, for example, (JE Sur. 2).

Wastewater Treatment Plant is operating in compliance with applicable regulatory requirements. (Ex. Joint 1)

The quality of the product: With the agreement among the parties that the Utility's wastewater treatment plant is operating in compliance with applicable regulatory standards, the quality of service based upon this prong of the test is unquestionably satisfactory.

Operational condition of the Utility's plant and facilities: The County's witness on this issue testified that the wastewater treatment plant was maintained "extremely well" (Tr. 225), it was operating very adequately (Tr. 227), and was very efficient and effective (Tr. 228). He concluded that the overall plant operation was very good. (DJ Dir. 2; Tr.234) Of the eleven customers who testified at the final hearing, one commented on the alarm going off at a lift station. (Tr. 30) The Utility's complaint log lists two other complaints about alarms going off at the lift station and both of those were for the same incident (Ex. RD 7f), which could possibly have been associated with the same incident that the witness testified to. An email to Office of Public Counsel ("OPC") also mentions this issue. (Ex. OPC 1) Mr. Flynn testified that all lift stations, not only the one in question, are equipped with an audible alarm and the phone number is clearly posted at the lift station for the purpose of having someone call if the alarm sounds. (Tr. 144-145) Thus, the fact that an alarm sounds does not indicate a quality of service issue; in fact, such alarms are required by FDEP. (Tr. 149) While the customer said the alarm sounded for 24 hours, one would question why she did not call the phone number on the lift station panel to report the alarm

condition. Mr. Flynn testified that it would be surprising to him that it would have taken 24 hours for the Utility to respond after the alarm had been reported, especially considering the relatively close proximity of operations staff to all lift stations. (Tr. 142, 144) The Utility routinely checks lift stations three times a week or more which includes identifying and documenting the amount of time the pumps have run, identifying whether the pumps are functional, testing the pumps to make sure they operate, and verifying the wet well is at its normal level. (Tr. 147) There is no evidence that the Utility is not operating its lift stations in compliance with all regulatory requirements, and the County's witness assumed as much. (Tr. 234)

One witness testified about a sewer line break or leak in Fiddlers Green Condominiums with his complaint directed primarily toward the expense the Utility incurred to haul off effluent from the wastewater treatment plant rather than the repair itself. (Tr. 12) The only odor complaint in the testimony came at the suggestion of OPC that claimed that it just "came up from the sewers" (Tr. 115). This witness testified he had no billing or customer service issues (Tr. 15) The Utility's complaint log listed three odor complaints in the test year and the two that were attributable to the Utility were resolved. (Ex. RD 7f) Despite repeated solicitations from OPC, other witnesses testified they had no odor issues. (Tr. 20, 22 and 33) The Utility responded satisfactorily and promptly to the few sporadic odor complaints raised by customers. The County has received very few odor complaints over the years (Tr. 206), and FDEP had received no odor related complaints (Tr. 208-209) Based upon the few customer complaints regarding the operational condition of the Utility's facilities and the Utility's response to such complaints, the operational condition of the Utility's plant and facilities should be considered satisfactory.

<u>Utility's attempt to address customer satisfaction</u>: This element of quality of service is the most subjective component when evaluating quality of service. However, a close analysis of the nature of the customer comments submitted through live testimony, in emails to OPC, through the County's website and directly to the Utility show that while not perfect, the Utility is diligent in addressing customer concerns.

There were 64 comments from customers submitted through the County's website. (Ex. RD 7e), and all but one were limited to the amount of the proposed increase in sewer rates. The only other comment was from the property manager of one of the Condominium Associations who raised a billing issue, and something about a sinkhole. Since there is no live testimony on either of those issues, these comments cannot serve as the basis for a finding of fact.

There were fifteen customers who presented comments (unsworn) at an informal customer meeting held on May 21, 2012. (Ex. RD 7d) All but three of those customers merely complained about the magnitude of the rate increase. Other than odor complaints, the issues, such as damage to roads, a sinkhole and an occasional bill not showing meter read detail, were not supported by live testimony and cannot serve as the basis of a finding of fact. The sinkhole was an issue raised in the County's Prefiled Testimony by Mr. Davis, but reflected Mr. Davis reporting what someone told him and thus should be considered hearsay. However, since the Utility did not know whether this issue would be raised at the

hearing with live testimony, it is addressed in Mr. Flynn's Pre-Filed Rebuttal Testimony wherein he states that the cause of the sinkhole was unrelated to any of the Utility's facilities and was, in fact, the responsibility of the customer to address. (PF Reb. 4-5)

It appears that the issue which got the most attention was the customer who testified that she had a problem getting through the customer service automated phone system (Tr. 26). She said that she had the problem twice in two months, and admitted some times were not bad, while others, particularly Friday afternoons, are bad. (Tr. 26) She also candidly admitted that most companies have problems with wait times. (Tr. 27) Interestingly, only one other customer, after prompting from OPC, testified that she had call center problems. (Tr. 49-51) Other customers testified they had no billing or customer service problems. (Tr. 15, 20, 22 and 33) The Utility has undertaken numerous efforts to improve customer service interaction including: implementation of an enhanced telephone system that allowed for the integration of the three customer care centers; enhanced and ongoing training of customer service representatives; a workforce that is responsive to varying call volumes throughout the work day; and establishing a performance metric of answering 90% of all incoming calls within 80 seconds. (PF Reb. 5)

The County has concluded that it does not have any substantial problem with the level of customer service provided by the Utility. (Tr. 197) The County had not received many complaints over the years, prior to the filing of the instant rate case. (RD Dir. 3; Tr. 197-198, 213) Although the County has not received a large volume of customer complaints, the County believes there is room for improvement in two areas. (RD Dir. 4)

The first was a quicker response time at the call center and better follow-up on back billing. (Tr. 210) However, when questioned, the witness admitted that the back billing issue was related specifically to the Habitat for Humanity customers and there is nothing that needs to be done prospectively. (Tr. 217) The issue that the County witness described as recurring was getting through the automated phone system. (Tr. 208) However, his concerns were unsupported by any analysis of wait times at other utilities. (Tr. 208) And as one of the customers testified, most companies have problems with their call centers. (Tr. 27) The County backed off of its original suggestion that the Utility hire a person to answer the phones. (Tr. 214) He never did explain how a caller would get faster service from a person answering the phone than an automated system and it defies logic that one would. (Tr. 214-215)

While the Utility strives for its customer service center to operate perfectly, it is an unattainable goal even with, or maybe because of, today's technology. The Utility takes customer service seriously as explained by Mr. Flynn. (PF Reb. 5) When the testimony of the persons appearing at the final hearing is closely analyzed, there were very few comments with substance as it relates to customer service. More customers expressed dissatisfaction about the scheduling of the final hearing at a time when many customers were up north than complained about the quality of service. Over one-third of the customers who testified stated that they had no billing, odor or customer service issues. (Tr. 15, 20, 22 and 33) Many complained about the status of the economy, and one wanted to politicize the process. (Tr. 35) It is clear after a review of all of the customer comments in

the record that the real customer dissatisfaction was due to the proposed rates but not with the quality of service.

<u>RATE BASE</u>

ISSUE 2: ARE ANY ADJUSTMENTS NECESSARY TO PLANT FOR UNDOCUMENTED ADDITIONS AND, IF SO, IN WHAT AMOUNT?

<u>Finding of Fact 2</u>: Yes. Based on the initial auditing of the Utility's Books and Records and additional information received from the Utility, the County's Rate Consultant has identified, and the parties agree, that Plant In Service Account 354.3 - Structures and Improvements shall be reduced by (\$11,155) related to undocumented plant additions. The parties agree that a corresponding reduction to Accumulated Depreciation Account 354.3 – Structures and Improvements in the amount of (\$1,171) shall also be made for the Test Year related to undocumented plant additions. (Ex. Joint 1)

ISSUE 3:WHAT ARE THE USED AND USEFUL PERCENTAGES OF THE UTILITY'S
WASTEWATER TREATMENT PLANT, WASTEWATER COLLECTION SYSTEM,
IMPACT FEES PAID TO EWD AND FACILITIES TO INTERCONNECT TO
EWD?

<u>Finding of Fact 3</u>: The appropriate used and useful percentage of the Utility's wastewater treatment plant is 59.89%, based on permitted capacity during the test year of 150,000 gpd. The appropriate used and useful percentage of the Utility's impact fees paid to the Englewood Water District ("EWD") is 41.62%. The appropriate used and useful percentages of the wastewater collection system and the force main, lift station and pumping facilities used to interconnect to EWD are 100%.

Argument: Several matters deserve reiteration at the outset. The County has not adopted any specific methodology for determining the used and useful percentages of wastewater facilities and is thus not bound by any prior determinations by the PSC, or by any PSC Rules. (FS Reb. 4) The County has greater prerogative in how it reaches its conclusions regarding used and useful. (FS Reb. 4) The County's witness admits that when he made his used and useful determinations he was aware that the PSC Rule was not binding on the County and that the PSC Rule only applied to the wastewater treatment plant. (Tr. 330-331) Notwithstanding that clean slate, the County's witness testified that he applied the PSC Rule in making his used and useful determinations of the wastewater treatment plant, the capacity purchased from EWD and the facilities to interconnect with the EWD. In fact, although the County's witness admitted that the PSC Rule applies only to wastewater treatment plants, he applies that rule to the interconnection facilities as well. (Tr. 331) In contrast, the County's witness admitted that he does not apply the used and useful concept when he advises his governmental client regarding ratemaking. (Tr. 329) It is a concept reserved for the regulation of investor-owned utilities and its application is subject to disagreement between equally qualified experts. (Tr. 332) Equally important is the County's witness agreeing that at the time the decision was made to purchase capacity from EWD and construct the interconnect facilities the decision was a prudent one. (AW Dir. 5)

Although it is clear from the testimony and evidence of the prudency of the Utility's investment in all of the facilities necessary to transport wastewater to the Englewood Water

District as discussed below, the Utility is sensitive to the substantial rate impact of determining all such facilities as being 100% used and useful, and thus agrees for the purpose of this proceeding to accept a used and useful percentage for the capacity purchased from EWD of 41.62% as discussed more fully below. The Utility, for the purpose of this proceeding, accepts the County's determination of used and useful of the permitted capacity of the wastewater treatment plant as 59.89% in the test year, along with the County's proposal that no non-used and useful adjustment be made because the Utility's CIAC level would cause the utility to incur a negative investment balance (JMW Dir. 6). In doing so, the Utility is consistent in its positions on used and useful of the wastewater treatment plant and the pro-forma adjustment in Issue 8A. In contrast, the County has taken inconsistent positions solely to reduce the Utility's revenue requirement. If the Hearing Officer makes the pro-forma adjustment to expenses proposed by the County in Issue 8A, then the pro-forma permitted capacity must be used, increasing the wastewater treatment plant used and useful to 90.74% (FS Reb. 9) The Utility's expert pointed out that the PSC had previously addressed this permitted capacity versus design capacity issue in virtually the same manner as that of the Utility. Order No. PSC-07-0609-PAA-WS (FS Reb. 7-8)

The County's witness tried to put a square peg into a round hole by applying PSC Rule 25-30.432 to the lift station, pumping equipment, force main and EWD capacity investments made by the Utility. (AW Dir. 3; Tr. 316). While doing so may make the determination of used and useful easier for such facilities, it defies sound ratemaking

principles. (FS Reb. 3) The Rule was developed specifically to apply to wastewater treatment plants and has no application to any other facilities. (FS Reb. 4) The Utility's expert witness who on this issue was involved in the PSC's used and useful ratemaking process beginning in 1973, testified as to the concept and the standard definitions, considerations and approaches developed to determine used and useful for wastewater treatment plants. (FS Reb. 4-5) Because of the complexity of establishing criteria for determining the used and usefulness of other components of a wastewater system the PSC abandoned any attempt to do so and focused only on a Rule regarding a wastewater treatment plant (FS Reb. 5) However, the PSC, in evaluating used and useful for collection systems has recognized that trunk force mains and gravity mains, prudently designed, should be consider 100% used and useful. The 12" force main constructed to serve the customers of Sandalhaven meets this criterion. (FS Reb. 18) The County's witness ignored the complexities and adopted the simple approach of using the wastewater treatment plant Rule for all of the other wastewater system components. (AW Dir. 3)

The determination of used and useful is not simply a mathematical calculation that ignores all subjective analysis of prudence, economics, economies of scale and factors effecting the utility's decisions. (FS Reb. 3) If such determination were a simple mathematical analysis as the County's witness believes, we would use accountants, not engineers, to address the issue. The County's financial witness implicitly admitted he was not qualified to determine used and useful regarding the Utility's facilities and instead relied upon Andrew Woodcock for such determinations. (JW Dir. 6) As pointed out by Mr. Seidman, the PSC has recognized used and useful as an engineering concept. Order No. 7684 issued March 1977. There is no generally recognized definition of used and useful and the County's witness' attempt is erroneous. (FS Reb 10)

The Utility is not taking issue with the use of this rule in determining the percent of used and useful for its wastewater treatment plant. It is taking issue with this language being used as a broad definition of used and useful and its application to components of a wastewater system other than the wastewater treatment plant for which the Rule was never intended to apply. For that evaluation, it is proper to turn to the FPSC's broader definition, especially with regard to its relationship to prudency. (FS Reb. 11)

One first needs to examine the events leading up to the Utility's decisions to invest in purchased treatment capacity, a large transmission force main and a pumping station as well as the overall necessity of that investment. As Mr. Flynn has chronicled in his testimony, several things were occurring at the same time that led to the Utility's investment decision. The Sandalhaven wastewater system was purchased by Utilities, Inc. of Sandalhaven in 1999. After addressing some 15 FDEP violations that occurred under the previous owner, the Utility began analyzing how it would maintain compliance with its operating permit as well as all FDEP rules and regulation governing the operation of its wastewater treatment and disposal system. The Sandalhaven treatment plant's permitted capacity had been set by FDEP at 150,000 gpd based on the treatment plant's design characteristics but limited by either the delivery of 100,000 gpd of reclaimed water at the Wildflower Country Club golf course or 150,000 gpd to the onsite rapid infiltration basins

(RIBs). However, based on operational experience, it was evident that the capacity of the RIBs was limited to no more than 100,000 gpd. (PF Dir. 4) A study commissioned by the Utility confirmed that the RIBs had poor percolation capacity and lateral seepage problems that negatively impacted the surrounding property but that rehabilitating the RIBs might offer some improvement of their operational performance. At that time, the Utility experienced minimal customer growth or increases in plant flow plus the availability of reliable disposal of all of the plant's flow to the golf course made the cost of rehabilitation of the RIBs an economically and operationally unwarranted investment, as both the treatment plant and the disposal capacity were adequate to serve both existing customers and some future customers. However, in 2004 two significant things happened. First, Wildflower Country Club ceased operations (PF Dir. 4), thus putting in jeopardy the adequacy of the Utility's disposal system, even for the existing customers, without at least reconsidering rehabilitating the RIBs. Even though the golf course owner allowed the Utility to temporarily use the former golf course property for effluent disposal while the Utility considered alternative disposal options, the Utility could not rely on the golf course as a permanent solution (PF Dir. 5; Tr. 151) The prudency of this decision became evident when the Wildflower property was ultimately sold and the use of the golf course property for effluent disposal was terminated by the new owner. (PF Dir. 5; Tr. 152, 156) Second, development within Charlotte County and in the Sandalhaven service area accelerated rapidly. Between 2002 and 2003, building permits in Charlotte County increased by 31% and between 2003 and 2004 by nearly 45%. (FS Reb. 12) In 2004, in response to frequent

inquiries by developers requesting wastewater service, the Utility commissioned the preparation of a master plan to consider the best way to move forward. (PF Dir. 1; Ex. PCF 1) There were five options considered in the master plan. They basically boiled down to either 1) expand the current treatment capacity to treat all existing and future flows or 2) abandon the plant altogether and purchase treatment and or disposal capacity from either the County or EWD. (FS Reb. 12) The more attractive choice was to expand the existing plant. However, FDEP was unwilling to permit the construction of subsurface injection wells without first implementing a multi-year pilot study which was cost-prohibitive. The Utility therefore opted to execute the next best economic choice which was to contract with EWD to purchase treatment and disposal capacity adequate to serve the Utility's service area at buildout and then to phase out the treatment plant's operation. (FS Reb. 12) At this point, any rehabilitation of the RIBs became moot. While this was going on, the Utility continued to receive inquiries from developers to serve specific multi-unit projects that would increase demand by 250,000 gpd by 2007, overwhelming its current facilities. Therefore, in 2005, two years in advance of the expected increased in flow the Utility moved forward on two fronts to insure its ability to serve its current customers and provide capacity for new customers in the most economical way available. It entered into negotiations with EWD to purchase 500,000 gpd in treatment and disposal capacity in increments. (FS Reb. 12; Ex. PCF 2, 2A) The interconnection and capacity purchase from EWD was not just for growth, but also because the Utility lost its primary means of effluent disposal. (Tr. 165) Flow generated from the Utility's existing customers in the winter

months was already greater than the percolation capacity of the RIBS. (Tr. 165) The Utility also moved forward with construction of a transmission main and master lift station to transport sewer flow to EWD. By the end of 2006, the Utility had completed the purchase of 300,000 gpd of capacity from EWD. The purchase of this capacity was sufficient to allow retirement of the existing WWTP to serve the existing customers and allow for projected short term customer growth. Notwithstanding language in the Utility's PAA Order (Ex. JW 6) to the contrary, Mr. Seidman explained that the documentation he filed with the PSC in that rate case showed that the interconnection and purchase of capacity from EWD was not just for future customers. (Tr. 386) OPC shows its naiveté in questioning why the Utility did not protest an otherwise acceptable PAA Order because of the erroneous language. By the end of 2006, construction of the force main and pumping plant was completed and placed into service shortly thereafter. Based on the best information before it at the time, the Utility made prudent and economic decisions in order to meet environmental constraints, to continue to serve existing customers and to provide service to future customers within its certificated service area. All of this investment was made and placed into service before the economy turned. (FS Reb. 11-13) When the real estate market in its service area collapsed, the Utility was able to negotiate a reduction of 200,000 gpd of capacity it had previously contracted to purchase from EWD. (PF Dir. 8)

Knowing what it knew at the time, had the Utility not acted as it had in a timely manner, the service to existing customers would have been jeopardized if not interrupted. The investment in capacity, in the force main and in the pumping plant was made to benefit

every customer, both existing and future. And it must be considered that the precipitous drop in residential and multi-family construction was not the result of unfulfilled "pie-inthe-sky" developer projections, but the result of a national recession that severely impacted the Englewood housing market after the Utility's investment in capacity, force main and pumping plant was completed. Additionally, the occupancy rate of completed dwellings dropped below the historical trend resulting in less wastewater flow being generated than projected but also depressing revenue. If this is not recognized in evaluating used and useful, then the result is what the County witness has determined - that it's only the formulas that count and the Utility must look only to future customers for relief. The County's witness has calculated that 68.43% of the Utility's investment in the EWD purchased capacity, 90.53% of the investment in the force main, 81.06% of the investment in the master lift station lift station and 65.56% of the investment in the pumps should be recovered prospectively, in the indeterminate future, through the application of an AFPI charge. (FS Reb. 13) As discussed below, AFPI does not make the Utility whole from a financial standpoint and prevents the Utility from recovering its prudent investment. (Tr. 392)

The consequence of the County's position is that it distorts the regulator/utility relationship. It sets up a one way street where the Utility is expected to act prudently and economically without any protection of its investment in property used and useful in the public service. Under such a relationship, there is no incentive for a utility to act prudently. It would simply wait until demand is upon it, in violation of its responsibilities,

and let potential customers wait the 12-18 months lead time necessary to design, permit and construct the additional facilities. (FS Reb. 14) In applying formulas upon which the County's witness relies, there is also the concern that he has given short shrift to the economies of scale of which the Utility has taken advantage. The County's witness agrees in principle with recognition of economies of scale, but seems to find no support for them. In doing so, he ignores the obvious. In his direct testimony, Mr. Flynn indicated economies of operation and economies of scale in construction of the force main, the lift station and the pumping plant. The construction of a 12" line to interconnect with EWD took advantage of economies of scale and was prudent. (PF Dir. 6) Had the Utility constructed a smaller force main initially followed by the building of another force main, when flows increased it would have had to construct not only the second force main, but a second wet well adjacent to the first one. (PF Dir. 8) Based upon Mr. Flynn's detailed discussion, we are left to conclude that the County's witness' strict reliance on a formulistic approach without any recognition of economies and economies of scale, and without recognition that the plant was constructed to serve both existing and future customers, severely understates the used and useful for the force main, lift station and pumping plant. All should be considered 100% used and useful. (FS Reb. 17-18) The Utility's position is not without precedence. In Docket No. 000694-WU, Water Management Services, Inc., the PSC determined that a 12inch water main rather than a 10-inch water main was the prudent and economic decision and found it to be 100% used and useful, even though the 10-inch main would have been adequate. As an aside, that determination was based on growth projections that never

occurred for the same reasons that growth for Sandalhaven never occurred – a national recession. (FS Reb. 18)

The application to the pumping equipment of the formula for calculating a used and useful percentage for treatment plants completely ignores the facts in this case as presented by Mr. Flynn that indicate the pumps were specifically downsized to provide for the most economic operation for near term requirements, not growth. (PF Dir. 3)

As to the capacity purchased from EWD, the Utility proposes, for the purposes of this case only, and in an effort to reduce the impact of such a significant revenue increase, that the 300,000 gpd capacity purchased from EWD be considered 41.62% used and useful. Based on the best information available at the time, the purchase of the 300,000 gpd of capacity was prudent and necessary in order to serve existing customers and near term projected growth. The projected flow during the winter months at the time the decision was made was nearly 400,000 gpd, including flow generated from existing customers. The 300,000 gpd purchase from EWD plus the 150,000 gpd permitted capacity of the Utility's WWTP at that time, would have been barely sufficient to avoid an interruption in service or conflict with environmental regulations. As Mr. Flynn indicates, the purchases cannot be reversed. However, a commitment to purchase an additional 200,000 gpd capacity was reversible and the Utility did cancel that purchase. Had the economy not collapsed, which was an unforeseeable event, the 300,000 gpd purchase would have been barely adequate. The County's witness has made a simple mathematical calculation of percent used and useful in accordance with the PSC rule for treatment plants. When the Utility made the

decision to purchase capacity from EWD, and in the data submitted to the PSC in the Utility's last rate case there were 1,230 potential units to be constructed. There are currently 512 units constructed out of the 1,230 potential units, which represents 41.62% of the potential number of units. (Tr. 118-119) In lieu of 100% of its prudent investment in the EWD capacity, the Utility will accept this reduced used and useful percentage.

The County Code (Sec.3-8-45(c)) provides that rates must be just, reasonable, nondiscriminatory and compensatory. This standard is not without Constitutional oversight. In *Federal Power Commission v. Hope Natural Gas Co.*, 320 U.S. 591 (1944), the United States Supreme Court established the "end result" doctrine, which states it is not how you get to the utility's revenue requirement, but the end result that counts. And that end result is that the return should be sufficient for a utility to maintain its credit and attract capital. Id at 603.

In *Duquesne Light Co. v. Barasch*, 488 U.S. 299 (1989), the U.S. Supreme Court considered a case with events similar to those in this one. The utility had joined with other utilities to build electric capacity in response to predictions of increased demand. When the outlook radically changed, the construction was cancelled. The utility requested permission to recover the expenditures for the unbuilt plant. The court found the actions of the utility to be prudent, but ruled against *Duquesne* because the unbuilt plant was not used. That, of course, is not the case with Sandalhaven. In Sandalhaven the plant (the wet well, pumps and interconnect force main) is completed and is used. The utility claimed the denial was unjust and unreasonable. But in the *Duquesne* case, the amount disallowed was only 1.9%

of rate base and therefore, the court ruled that even with this disallowance, the results were not unreasonable. In the Sandalhaven case, however, the amount disallowed is nearly 80% of rate base. The court went on to point out that the guiding principle has been that the Constitution protects utilities from being limited to a charge for their property serving the public that is so unjust as to be confiscatory. Whereas, denying *Duquesne* recovery of 1.9% of its rate base was not unjust and unreasonable, denying Sandalhaven a return on nearly 80% of the Utility's rate base clearly is unjust and unreasonable, to the point of being confiscatory.

The dollar return on rate base proposed by the County will produce only a 1.03% return on what even the County agrees is prudent investment. This is not even enough to recover interest expense, let alone any return on equity. Or to look at it another way, the annual interest expense alone associated with prudently invested plant is \$150,000, while the return proposed by the County to cover both interest expense and a fair rate return on equity is only \$47,000. (FS Reb. 15-16)

<u>ISSUE 3A</u>: SHOULD ANY ADJUSTMENT BE MADE TO WASTEWATER TREATMENT AND ACCOUNT 353.4 FOR THE LAND, WHICH WAS PURCHASED FOR THE PROPOSED PLANT EXPANSION, AND IF SO, IN WHAT AMOUNT?

<u>Finding of Fact 3A</u>: Yes, a non-used and useful adjustment in the amount of \$73,089 should be made for the .96 acre portion held for future use. (Ex. Joint 1)

ISSUE 4: WHAT IS THE APPROPRIATE WORKING CAPITAL ALLOWANCE?

Finding of Fact 4: The appropriate working capital allowance is \$60,953.

Argument: This is a fallout amount.

ISSUE 5: WHAT IS THE APPROPRIATE RATE BASE FOR THE TEST YEAR PERIOD ENDED DECEMBER 31, 2010?

Finding of Fact 5: The appropriate rate base for the test period ended December 31, 2010 is \$3,540,738.

Argument: This is a fallout amount.

COST OF CAPITAL

ISSUE 6: WHAT IS THE APPROPRIATE RETURN ON EQUITY?

<u>Finding of Fact 6</u>: The parties agree to use the most recent leverage formula approved in Florida Public Service Commission Docket No. 120006-WS at the June 19, 2012, Commission Conference which was memorialized in Order No. PSC-12-0339-WS issued June 28, 2012, which results in a return on equity of 10.52%. (Ex. Joint 1)

<u>ISSUE 7</u>: WHAT IS THE APPROPRIATE WEIGHTED AVERAGE COST OF CAPITAL INCLUDING THE PROPER COMPONENTS, AMOUNTS, AND COST RATES ASSOCIATED WITH THE CAPITAL STRUCTURE?

Finding of Fact 7: The weighted cost of capital is 7.79%.

<u>Argument</u>: This is a fallout amount, reflecting Sandalhaven's position and adjustments in Issues 3, 3A, 8 and 10.

NET OPERATING INCOME

<u>ISSUE 8</u>: ARE ANY ADJUSTMENTS NECESSARY TO TEST YEAR REVENUES, AND IF SO, IN WHAT AMOUNT?

<u>Finding of Fact 8</u>: Yes. Test year revenues should be increased by \$48,808 to account for the eleven Habitat for Humanity homes that were not billed in the test year.

Argument: During the test year, eleven customers living in homes constructed by Habitat for Humanity were not billed since the Utility was unaware that they were connected to the Utility's wastewater system until September, 2011. (PF Reb. 2) The customers of the Utility receive potable water service from Charlotte County Utilities, and at the time the builder pulled the building permits, he listed Charlotte County Utilities as the provider for wastewater service, which may have contributed to the confusion at the County as to the provider of wastewater service. (JE Sur. 2; Ex. JE 1) The County now has a procedure in place to verify the provider of wastewater service. (JE Sur. 2; Ex. JE 1)

The County's witness calculated the loss of revenues based upon actual water usage during the test year and suggested an increase in revenues of \$53,529. (JW Dir. 9) Had these customers actually received bills, they would have responded to the price signal and repressed their consumption to a level closer to the average consumption within each affected rate classification, and it is that level of consumption that can be expected on a going forward basis. (EA Reb. 5) The Utility's calculations indicate that revenue for these customers, based on consumption at the average level for the affected classes, is \$34,086. (EA Reb. 5) However, recognizing the lack of precision of either analysis, the Utility suggests an average of the two proposals be calculated and applied, which results in unbilled test year revenues of \$48,808, representing about a 10% reduction in usage by these customers due to the recognized ratemaking principle of repression. (EA Reb. 6; Ex. EA 3)

<u>ISSUE 8A</u>: ARE ANY ADJUSTMENTS NECESSARY TO TEST YEAR EXPENSES RELATED TO THE RECENTLY RE-RATED WASTEWATER TREATMENT PLANT?

<u>Finding of Fact 8A</u>: No adjustments to expenses are necessary due to the post test year re-rating of the wastewater treatment plant.

Argument: Pro forma adjustments are those made for known and measurable changes subsequent to the test year. (Tr. 308) While the Utility has the burden of proof with regard to the schedules it submitted and other material it relies upon (Sec. 3-8-55), the burden of proof in asserting a pro-forma adjustment is on the party asserting the adjustment, in this case, the County. The County has failed to meet its burden. To make this adjustment, the County seeks to reduce expenses by the total amount booked in NARUC Account 6270, even though the County witness was unaware as to whether that account included testing expenses unrelated to the re-rating of the wastewater treatment plant. (Tr. 309)

The County has recognized for purposes of decreasing operating expenses that the re-rating of the wastewater treatment plant from 150,000 gpd to 99,000 gpd, was a known and measurable change subsequent to the test year (Tr. 298) but the County's used and useful witness refused to recognize that re-rating in his used and useful determination for the wastewater treatment plant (Tr. 324) in reaching his conclusion that the wastewater treatment plant was only 59.89% used and useful. (AW Dir. 5) The County cannot take inconsistent positions. The Utility accepts the County's wastewater treatment plant used and useful percentage, thus it is not appropriate to make any post test year adjustment to expenses.

<u>ISSUE 9</u>: SHOULD ANY ADJUSTMENTS BE MADE TO THE UTILITY'S CONTRACTUAL SERVICES TESTING AND OTHER, AND IF SO, IN WHAT AMOUNT?

Finding of Fact 9: No adjustment should be made to contractual services testing and other.

Argument: For review purposes, the County has combined the Utility's miscellaneous expenses (Issue 11), with contractual services testing and other and suggested an adjustment of (\$15,081) based upon what the witness calls a "benchmark analysis". (JW Dir. 9-10) In effect, without regard to actual expenses in the test year, the County's witness compared the expenses from the Utility's last rate case in 2005 and applied the PSC's GDP Implicit Price Deflator Index and arbitrarily reduced expenses down to that amount. The County's witness admitted that he does not utilize a "benchmark analysis" when advising his governmental clients in ratemaking (Tr. 306), and the "benchmark analysis" is only used to reduce expenses (Tr. 307) It is thus a tool for the County to use to artificially reduce revenue that is otherwise rightfully due the Utility. Even though the actual expenses for the test year are known and measurable (Tr. 339), the County seeks to arbitrarily reduce them without any review of the reasonableness of each such expense.

A "benchmark analysis" abandons a traditional test year methodology in favor of a backward looking approach that permits the selection of certain expense categories, examines them over an arbitrary historical period, adds an adjustment for the changes in the GDP Price Deflator Index or CPI Index and growth, and then reduces the Company's test year expenses to reflect that benchmark amount. To do so is inconsistent with the known and measurable standard for adjusting test year expenses. There can be many reasons for expenses to increase or decrease from one year to the next. Changes in expenses do not necessarily follow the very simple pattern of changes in inflation and growth. Expenses should be evaluated on their own merit. All a "benchmark analysis" does is provide an arbitrary result that relieves a regulatory body from having to evaluate the reasonableness of actual expenses in the test year. (EA Reb. 3)

The 2005 test year for the Utility's last rate case is not an appropriate benchmark year because it is not representative of ongoing expenses in these categories and not representative of the wastewater utility industry. The County's witness' "benchmark analysis" does not take into account expense categories that have decreased. In addition, one of the accounts to which the County's witness chose to apply the "benchmark analysis" includes actual expenses needed to run the Utility, such as expenses paid to Charlotte County Utilities to obtain meter reads. If you apply the "benchmark analysis" to that expense, the increase from what the County charged in 2005 and what it charged in the test year would result in the Utility having insufficient funds to pay Charlotte County for meter reads. (EA Reb. 3; Tr. 340) Since the County is arbitrarily reducing this expense, can the Utility reduce its payment to the County? One would doubt that the County would accept a reduced amount based on a "benchmark analysis", nor would other vendors faced with the same unilateral action accept an arbitrary reduction such as this.

The expenses which the Utility has requested are just and reasonable (Tr. 342) and any arbitrary reduction based on the County's "benchmark analysis" is inappropriate.

ISSUE 10: IS THE COMPANY'S LEVEL OF INFLOW AND INFILTRATION (I&I) EXCESSIVE AND, IF SO, WHAT ADJUSTMENTS ARE NECESSARY?

<u>Finding of Fact 10</u>: The Utility has excessive I&I of 16,796 gpd, which should be allocated 9,165 gpd to the wastewater treatment plant, and 7,630 gpd to the flows sent to EWD for treatment. This results in an adjustment to purchased wastewater of (\$20,273), to purchased power of (\$2,295) and chemicals of (\$1,344)

Argument: The Utility and the County agree that the Utility has excessive I&I of 16,796 gpd, which should be allocated 9,165 gpd to the wastewater treatment plant, and 7,630 gpd to the flows sent to EWD for treatment. (FS Reb. 8) This results in an adjustment to purchased wastewater of (\$20,273), to purchased power of (\$2,295) and chemicals of (\$1,344). (JW Dir. 10)

ISSUE 11: SHOULD ANY ADJUSTMENTS BE MADE TO THE UTILITY'S MISCELLANEOUS EXPENSES, AND IF SO, IN WHAT AMOUNT?

Finding of Fact 11: No adjustment should be made to the Utility's miscellaneous expenses.

Argument: See arguments in Issue 9 above.

ISSUE 12: WHAT IS THE APPROPRIATE AMOUNT OF RATE CASE EXPENSE?

Finding of Fact 12: The appropriate amount of rate case expense is \$173,471.

Argument: Reasonable rate case expense is an operating expense to which a utility is entitled in the ratemaking process. The Utility's last rate case utilized the PSC's PAA process, with which the Hearing Officer is familiar. It is a process without the expense of a formal hearing's prefiled testimony, an actual hearing and post-hearing filings, and it is intended to be less expensive than a full evidentiary hearing such as the instant proceeding (Tr. 310). The County used an anticipated amount of rate case expense by taking the amount approved by the PSC in the Utility's last rate case and escalating it for inflation which resulted in an estimate of \$157,707. The rate case expense actually incurred is only \$15,764 or 10% greater than the amount. This is a reasonable increase in light of the substantial additional time involved in a formal hearing versus a PAA proceeding. However, the formal hearing process includes the post-hearing filing of a Proposed Recommended Order, and the Utility is entitled to the reasonable expense of preparing that document. OPC admitted that if the rate case expense is in line with what was spent in the last case or a little higher that it would be reasonable. (Tr. 278) For instance, the PSC in the Utility's last rate case approved legal rate case expense of \$66,240, and in the instant case, it is only \$68,815.64, or a modest 3.7% increase, without any adjustment for inflation.

By virtue of the Exhibits introduced by OPC on this issue (OPC Ex. 3-4) and argument of OPC counsel at the hearing (Tr. 278), OPC is going to contest the in-house employee rate case expense incurred by the Utility. The County's witness who OPC questioned about the PSC Order excerpts was not familiar with them (Tr. 288-290). OPC asserts that the PSC in those PAA Orders disallowed in-house rate case expense. However, such determination was based upon the facts of that case, and there is no evidence in the record that those facts are present in the instant case. OPC chose to ignore the Hearing Officer's suggestion to question the Utility's witness about rate case expense (Tr. 272). In the Utility's last rate case at the PSC, based upon the facts presented in that case, in-house

rate case expense was allowed. (Ex. JW 6) The Utility also pointed out several other PSC Orders where the PSC allowed in-house rate case expense. (Ex. Utility 2, 3 & 4) The conclusion to be drawn from these PSC Orders, all of which were PAA proceedings, is that in-house rate case expense is determined on a case-by-case basis, and there is no evidence in the record of this proceeding to support OPC's assertion that the Utility should not be allowed to recover in-house rate case expense. OPC did not even attempt to support its .assertion through cross examination of the Utility's witness.

All rate case expense requested is substantiated in the Exhibit which, due to its size, will be submitted separately, and is reasonable.

ISSUE 13: WHAT IS THE TEST YEAR WASTEWATER OPERATING INCOME OR LOSS BEFORE ANY REVENUE INCREASE?

Finding of Fact 13: The test year operating loss before any revenue increase is (\$338,482).

Argument: This is a fallout amount.

REVENUE REQUIREMENT

ISSUE 14: WHAT IS THE APPROPRIATE REVENUE REQUIREMENT?

Finding of Fact 14: The appropriate revenue requirement is \$ 1,291,302.

Argument: This is a fallout amount.

ISSUE 15: WHAT ARE THE APPROPRIATE WASTEWATER RATES FOR THE UTILITY?

Finding of Fact 15: The appropriate wastewater rates are attached hereto.

Argument: This is a fallout determination.

ISSUE 16: WHAT ARE THE APPROPRIATE MISCELLANEOUS CHARGES FOR THE UTILITY?

<u>Finding of Fact 16</u>: The appropriate miscellaneous service charges are as follows (Ex. Joint 1):

Type Charge	Bus. Hrs.	After Hrs.
(a)	(d)	(e)
Wastewater		
Initial Connection Fee	\$21.00	\$42.00
Normal Reconnection Fee	\$21.00	\$42.00
Violation Reconnection Fee	Actual Cost	Actual Cost
Premises Visit	\$21.00	\$42.00
System Capacity Charge:		
Residential-per ERC		
or per Lot	\$2,628.00	
All others-per Gallon/Day	\$13.83	
Other:		
Flow Meter Installation		
Residential	Actual Cost	
All others	Actual Cost	
Plan Review Charge	Actual Cost	
Inspection Charge	Actual Cost	

Argument: Staff and Utility stipulate to the appropriate miscellaneous service charges and OPC takes "No Position" on the appropriate miscellaneous charges stipulated to by the Staff and Utility.

ISSUE 17: WHAT IS THE APPROPRIATE ALLOWANCE FOR PRUDENTLY INVESTED (AFPI) CHARGES FOR THE UTILITY?

Finding of Fact 17: The appropriate AFPI charge is set forth on the Schedule attached hereto.

Argument: The AFPI charges will be a fall-out based on the approved amount of non-used and useful plant, expenses and ERCs. The charge will increase monthly until 5 years from the effective date at which time the charge will be capped. The charge will be discontinued when the number of ERCs used to establish the charge have been connected. (Ex. Joint 1) The appropriate rate of return to be used in calculating AFPI charges is 7.95%.

AFPI is not a substitute for a return on prudently invested capacity purchased from EWD. The County's witness proposes the use of the AFPI charge as the solution to the Utility's problem of recovering costs associated with the County consultant's determination that approximately 68.43% of its rate base is prudent but not used and useful. The AFPI, or Allowance for Funds Prudently Invested, is a mechanism devised by the PSC as a means of recovering the costs associated with prudently invested non used and useful plant from future customers only. As the County's witness admitted, AFPI is intended to recover from future customers the cost of future growth (Tr. 250), and does not result in a full recovery to the Utility in the instant case where the cost is not just for future customers. For a regulated utility, under normal circumstances, AFPI is better than nothing. After all, costs will be recovered – someday, but, unfortunately, not when the bill comes due. (FS Reb. 21) The County's witness admits that the Utility may never recover those costs. (Tr. 250) If an

AFPI charge is used, it should be based on the non-used portion of the Utility's impact fees paid to the Englewood Water District ("EWD") (See, Issue 3). In addition, the calculation should use a rate of return of 7.95%, the rate of return associated with all of the prudently invested plant. (FS Reb. 16-17) On this basis, the first month AFPI charge would be \$28.92 per ERC, beginning in December, 2012 (assuming the County Commission acts as scheduled) and would increase monthly until it reaches the amount of \$1,983.53 per ERC per month, after five years. (See attached Schedule.)

ISSUE 18: SHOULD RATES BE REDUCED FOUR YEARS AFTER THE ESTABLISHED EFFECTIVE DATE TO REFLECT THE REMOVAL OF THE AMORTIZED RATE CASE EXPENSE, AND IF SO, WHAT IS THE APPROPRIATE AMOUNT BY WHICH RATES SHOULD BE REDUCED?

<u>Finding of Fact 18</u>: Yes. Rate case expense should be amortized and recovered over a four-year period, with the Utility following the procedure for automatic reduction and notifying customers as established by the PSC. The exact amount will be determined based upon the amount of rate case expense approved in Issue 12 above. (Ex. Joint 1)

ISSUE 19: SHOULD THE UTILITY BE REQUIRED TO PROVIDE DOCUMENTATION WITHIN 90 DAYS OF AN EFFECTIVE ORDER FINALIZING THIS DOCKET TO SHOW THAT IT HAS ADJUSTED ITS GENERAL LEDGER FOR ALL THE APPLICABLE NATIONAL ASSOCIATION OF REGULATORY UTILITY COMMISSIONERS (NARUC) UNIFORM SYSTEM OF ACCOUNTS (USOA) PRIMARY ACCOUNTS ASSOCIATED WITH THE COUNTY APPROVED ADJUSTMENTS?

<u>Finding of Fact 19</u>: Yes. The Utility will provide copies of its general ledger pages reflecting the adjustments within 90 days of an effective order finalizing this docket. (Ex. Joint 1)

CONCLUSIONS OF LAW:

1. The County Board of County Commissioners has jurisdiction to decide the Utility rate application pursuant to Charlotte County Ordinances 2007-092, and as codified as Chapter 3-8, of the Charlotte County Code. *See also*, §§ 367.171(3) and (8), Florida Statutes. The Hearing Officer was appointed in accordance with Section 1-10-342 of the Charlotte County Code.

2. Rates to be charged by a utility must be just, reasonable, compensatory and not unfairly discriminatory. Sec. 3-8-14(4), Charlotte County Code. *FPC v. Hope Natural Gas Co.*, 320 U.S. 591 (1944).

3. In setting rates the County Board of County Commissioners shall determine the actual original cost of property used and useful in public service. Sec. 3-8-62(a), Charlotte County Code. In doing so, the County has not adopted any specific methodology for making such used and useful determination, and is not required to, nor has it taken any action to follow the methodology adopted by the Florida Public Service Commission.

4. The Board shall fix and determine a rate which allows for reimbursement of operating costs including depreciation on all properties, excluding contributed properties, and a fair and reasonable net return on the original cost of a system incurred by the person first dedicating it to public service, which shall not include contributions in aid of construction or customer contributions. Sec. 3-8-62(a), Charlotte County Code.

5. The appropriate test year to be used in this case is the historical fiscal year ending December 31, 2010. Sec. 3-8-58, Charlotte County Code.

6. Adequate notice of the hearing was given at the times and in the manner required by Section 3-8-50(c), Charlotte County Code.

7. Based on all the evidence, including the testimony and exhibits admitted at the hearing, the revenue requirements, rates of return, and rates requested by Utilities Inc. of Sandalhaven are just, reasonable, compensatory, and not unfairly discriminatory.

8. The wastewater collection, treatment and disposal system operated by Utilities Inc. of Sandalhaven meets all minimum standards established by the State of Florida in terms of health, safety and welfare. The wastewater system has no outstanding citations or enforcement issues.

9. The overall quality of service of Utilities Inc. of Sandalhaven is satisfactory.

RECOMMENDATION:

Based on the foregoing findings of fact and conclusions of law, it is RECOMMENDED that the Board of County Commissioners:

1. Issue a Final Order granting Utilities Inc. of Sandalhaven's Application for an Increase in Wastewater Rates consistent with the Findings of Fact and Conclusions of Law above.

CERTIFICATE OF SERVICE DOCKET NO.: 2011-001-S

I HEREBY CERTIFY that a true and correct copy of the foregoing Proposed Recommended Order has been furnished by e-mail this 1st day of October, 2012, to:

Employee Travel and Business Expense Reimbursement Form

Utilities, Inc.

INSTRUCTIONS

In General

- 1. Refer to the Employee Travel and Business Expense Reimbursement Policy for further guidance on specific expense items.
- 2. All expense reports should be sent to the Accounts Payable Department in Northbrook II.
- 3. All receipts not already "8.5 by 11.0" must be taped to an 8.5" by 11.0" sheet of paper and accompany the expense report. Original expenses must be submitted in order for an expense to be reimbursed.
- 4. All questions, including assistance with object codes, should be directed to Accounts Payable.

Page 1

- 5. Input <u>name</u> and <u>business unit</u> (which will automatically carry forward to page 2).
- 6. Expense Summary input the amount of any <u>cash advance</u> or any <u>amounts charged on a corporate credit card</u> as a negative number. All other amounts will calculate automatically.
- 7. Mileage Reimbursement Calculator input the <u>number of miles driven</u> and the mileage reimbursement will be calculated. Note that the amount of the reimbursement does not automatically feed into page two of the form.
- 8. Input purpose of employee travel.
- 9. Sign and date.
- 10. Approver sign and date.

Page 2

- 11. Input date, vendor, description, BU or project code and amount of each expense item.
- 12. Input the <u>type of expense</u> by clicking on that field which will provide a drop down menu of expense items to choose from. Hotel bills should be split out between lodging, meals, telephone, etc. If "project cost" is selected, a project code must be entered in the <u>BU or</u> <u>product code</u> column.
- 13. Object codes will automatically be displayed once the type of expense is selected.
- 14. In order to be reimbursed, expenses for business meetings must provide the names and companies of those in attendance along with the purpose of the business meeting. This information can also be input in the fields provided on page 1.

Club

Relax in our exclusive airport clubs by purchasing a day pass or an annual membership.

Oriando Car Rentals

, Hertz,

Book with our preferred car partners to save up to 35% and earn 75 reward miles per day.

Important Travel Information:

The U.S. government raised the security alert level and implemented extra restrictions to assure the security of air travel. Certain changes in airport procedures and restrictions on items allowed on board aircraft are detailed on the <u>Travel Alert: Elevated Security</u> page.

Any changes to your flight reservations may incur additional charges.

Airlines require government issued photo identification upon check-in, such as a driver's license or passport. <u>Passport, visa and health requirements</u> may apply for this itinerary. Each passenger must ensure he or she has all required travel documents as stated in Rule 19 of the <u>Contract of Carriage</u>. Information on this site is provided as a courtesy and should be verified by the passenger before travel. Other resources include the consulate of the destination country and the <u>U.S. Department of State</u>.

Please read important information governing airline baggage liability limitations.

You will be contacted with any changes or additional information such as schedule changes, itinerary changes, etc. Special services are on a request basis and cannot be guaranteed.

Special meal requests must be received at least 24 hours before the departure of your flight and cannot be guaranteed.

*Miles shown are the actual miles flown for this segment. Fare class, Premier qualifying miles and other promotional bonuses are not included in the total miles shown. The award miles accrued on codeshare flights are based on the operating carrier and their equivalent fare class. This could result in differences between the purchased booking class and the booking class flown, which determines the number of base and Premier qualifying miles and Premier qualifying segments earned. MileagePlus award miles are not awarded for travel on airlines that are not MileagePlus partners. Miles indicated for non-partner flights or flight segments will not be awarded. MileagePlus award miles earned will vary depending on the <u>Premier status</u> of the customer.

SpringHill Suites by Marriott Altamonte Springs 205 West State Road 436 Altamonte Springs, FL 32714 T: 407.865.6400 F: 407.865.6773 www.altamontespringsflhotel.com

Dear Valued Guest,

On behalf of the SpringHill Suites by Marriott Altamonte Springs and our entire team, I want to thank you for staying with us while visiting the Altamonte Springs / Orlando, Florida area. We recognize that you have many hotel options to choose from and we are very appreciative that you chose to stay with us.

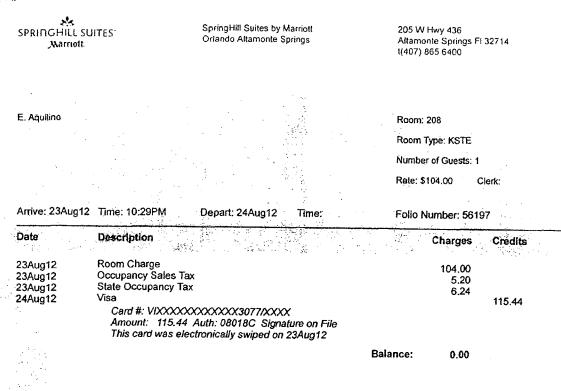

It is our hope that you experienced a comfortable, restful and productive stay with us. If there is anything you would like to share with us, we are available at any time. Our Guest Service Agents are available 24 hours per day in the lobby or feel free to contact me, Larry Grant, General Manager and it would be my pleasure to assist you. Every comment is important to us as it helps us to maintain our strengths and to improve where necessary.

As a Marriott Guest, you may receive a Guest Survey via e-mail in a few days. It is our hope that we have delivered on our Perfect 10 Service Goal and ask that you take a few minutes to complete the survey and tell us if we succeeded. I personally review every survey on a daily basis and look forward to your comments. If something got in the way of our goal to provide you with an excellent stay, I hope you will share it with me or our Guest Service Agent before you depart so we may correct it for you.

Wishing you safe travels,

any

Larry Grant General Manager
