

Longshoreman's Insurance Coverage

If you work ON OR ABOVE the water – you are required, by Federal Law, to hold Longshoreman's Insurance.

To ensure you have the proper coverage, Charlotte County Community Development will be tracking this coverage along with your general liability insurance and workman's compensation coverage.

Changes are being made to certain permit types to ask during application if the work is being done on or above the water. If the answer is YES, we will require a valid Longshoreman's policy.

For more information, or to find out how to update your insurance details, please contact 941-743-1201.
