

Why **SCOOP** That **POOP**?

1 tiny gram of dog poop

just 1 dog

of poop per year!

PET WASTE & STORMWATER

And, despite popular belief, pet waste can't be used as fertilizer because it's too acidic.

Dog poop can contain harmful bacteria and parasites.

Poop that's left on the ground doesn't decompose very fast. Instead, water can move it down storm drains or ditches and into waterways.

This can cause problems for aquatic plant and animal communities and treating drinking water.
