Business:

- Habitat Restoration Area – There was extensive discussion on the location of the pole and troll areas. Area maps were reviewed and discussed. Boaters would continue to have access to the area considered a safety zone. The survey will not be done until June. The survey will identify the extent of the sea grass scaring for NICM purposes. This project may improve the flushing and water quality in Pirate Harbor Waterway. The committee will identify and make a decision on the areas after they have been supplied with the environmental data. The map was marked and Mr. Mopps will submit this information to the consultant.
