

Charlotte County Community Services is pleased to announce its...

# WeatherBug® Lightning Alerting System

Now view REAL-TIME LIGHTNING STATUS  
at any of our pools!

Visit [www.CharlotteCountyFL.gov](http://www.CharlotteCountyFL.gov)  
or the

NEW Charlotte County, FL App  
and know before you go whether pool activity  
is temporarily suspended due to lightning.

Charlotte County Community Services uses the WeatherBug® Outdoor Lightning Alerting System at all three county pools. It is the most accurate system and new standard in lightning detection technology.

When the system detects lightning within 10 miles of the facility, the air horn sounds an uninterrupted 15-second blast and a strobe light will activate. When the horn and/or the light activates, the lifeguards will direct you to clear the pool area and seek shelter indoors for 30 minutes. Each time lightning is detected within 10 miles, the alert system timer resets to 30 minutes and begins counting down again.

When the system no longer detects a threat, three 5-second blasts from the horn will sound and the strobe light will stop flashing. The lifeguards will announce when the pool reopens.

How to read the WeatherBug widgets:

- An **Active Alert** means the pool will remain closed until there is **No Alert** and the lifeguards announce that the pool is open.
- If the Connection is **Down** or **Not Set** please check with the lifeguards to see if the pool is open.
